PROJECT EXPERIENCE

Employer Job Post Website — Launchcode LC101

- Used Java, Thymeleaf, and SpringBoot to make a full stack application that allowed for employers to post new opportunities that they were looking to fill.
- Used JPA, JDBC, and created API calls to allow CRUD operations to a database.
- Added authentication and filtering functionality to restrict access based on permissions of a user.

WORK EXPERIENCE

Operations Manager, Apertus Pharmaceuticals, Ballwin, MO, December 2016 – Present

- Refined old and implemented new operation practices that greatly increase yield from production batches.
- Maintained a detailed log of all of the usage and cleaning of various machinery and equipment.
- Managed a small team tasked with delivering customer orders in a rapidly changing fast-paced environment.
- Tested and analyzed materials received and produced batches to verify the identity of the test and that the test conforms to certain acceptance criteria.
- Debugged countless issues that arose from the machinery used.

Assistant Manager, Leslie's Pool Supplies, St. Louis, April 2016 – October 2016

- Managed the store through keeping inventory stocked and handling day to day financials.
- Researched issues that customers brought in not familiar with initially, and repaired any pool equipment or chemical issues with the water once the problem was diagnosed.

Production Worker, Lafayette Industries, St. Louis, MO, Month 2011 – Month 2015

- Staged and completed multiple packaging projects for a sheltered workshop.
- Supervised a team of around 30 people to accomplish tasks needed.
